THE BENEFITS OF A COMMUNAL PLAYGROUND:

1. Cost Sharing:

If costs are shared, it's more affordable to install and maintain quality equipment and surfacing.

2. Community Building:

Playgrounds bring people together turning shared spaces into hubs of community life.

3. Encouraging Outdoor Play:

Safe communal play spaces offer a way to promote healthy, active lifestyles (important for child development) without needing a private garden.

4. Increased Property Appeal:

A well-designed, compliant, and maintained playground can increase the value and appeal of residential complexes and public spaces.

MAINTENANCE & SAFETY:

Broken equipment, non-compliant surfacing, or poor design can lead to serious injuries.

Regular inspections, certified surfacing, and compliance with safety standards like SANS 51176 are required.

Invest in quality, schedule regular inspections and ensure the people designing, installing and maintaining your play areas understand local safety regulations.
