

HAPPY WORLD MANGROVE DAY!

WHY ARE MANGROVES IMPORTANT?

PROTECT MARINE LIFE

They provide a safe nursery for young fish, crabs and other species.

PROTECT OUR COASTLINES

Their roots act as a natural barrier, reducing erosion and protecting us from storms.

CLEANER, HEALTHIER WATER

Mangroves filter pollutants and sediments, helping to keep our rivers and oceans clean.

FIGHTING CLIMATE CHANGE

Mangroves store large amounts of carbon, helping protect our planet.
