

WORLD DROWNING PREVENTION DAY!

Water safety starts before you
even get into the water.

4

simple ways to help keep
children safe around water.

1.

ALWAYS SUPERVISE CHILDREN

Stay within arm's reach of young children around pools, dams, rivers and the beach.

2.

SWIMMING IS A LIFE SKILL

Encourage children to learn to swim and practise water safety from an early age.

3.

WEAR A LIFE JACKET

When boating or taking part in water activities, a properly fitted life jacket can save lives.

4.

KEEP WATER AREAS SAFE

- Fence home pools.
- Keep gates closed.
- Learn CPR.
- Always swim with a buddy.
- Listen to lifeguards when at the beach. Rip currents are strong, even for experienced swimmers.
- Pay close attention to your children if you are at someone's house whose pool is not covered or gated.
