

# CELEBRATING NATIONAL PARKS WEEK

2-6 September 2021

# What is a National Park?

A national park is an area set aside by a national government for the preservation of the natural environment.

# What do they do?

National parks help us to learn about the environment, history and wildlife.

National parks are places for everybody to learn about native plants and animals and the way they rely on each other.

Most of the landscapes, plants, and animals in a national park are kept in their natural state.

# Where are South Africa's National Parks?
